

Category:	Verification modules
Manufacturer:	MK Gilze
Frame length:	950 mm
Output Belt:	Modulair belt
Condition:	New

This module (Sort) can be used to export products that are too heavy to the left and metal to the right.

this machine is suitable for pouring 10KG products in a limited length. the products are pushed off the belt by means of plastic carriers. for this module a different machine needs to be placed to develop an error signal.

in this version, the machine can execute +/- 20 incorrect packages per minute, both to the left and to the right
